Solar Power Fundamentals

Mike Niehoff is a solar estimator at Blattner Company located in Avon, MN. Blattner Company is focused on providing engineering, procurement and construction services for utility scale wind and solar projects located throughout the United States. Mike’s presentation will be centered around the fundamentals of solar energy. This will include the basic components of solar plant, how a solar cell works, uses for solar technology and some basic engineering and construction principles that are used in building a solar plant.

We also will each be building a mini solar powered car!

To get a headcount for catering, an email RSVP is required by February 3rd to: adam@srwdmn.org
